CAREER OBJECTIVE

Aspiring Software Engineer with hands-on experience in building scalable full-stack and AI-driven applications. Passionate about designing secure, user-centric systems and contributing to high-impact product development teams.

EDUCATION

KLE Technological University, Belagavi B.E. Computer Science	[Passed Out 2025] CGPA: 7.7
Maratha Mandal Polytechnic, Belagavi Diploma in Computer Science	67.42%
ST. Xavier's High School, Belagavi High School Belgaum	64%

TECHNICAL SKILLS

Programming Languages:	C, C++, C sharp, Python
Web Technologies:	Django, React, Spring Boot, Bootstrap, HTML, CSS
Databases:	SQL, PL/SQL, MongoDB, SQLite
Tools:	GitHub, VS Code, Wireshark, Selenium, Google Colab

SQL

Good understanding of SQL queries to fetch, insert, update, and delete data.
Able to use JOINS to combine data from multiple tables.
Able to sorting data using WHERE, ORDER BY, and GROUP BY.

MONGODB

Able to use MongoDB Compass for GUI-based database management.
Designed and used schema-less data models suitable for flexible and fast development.

PROJECTS

SmartOrgan – Web-Based Organ Management System	Django, SQLite, REST API
• Developed a secure, role-based web application connecting donors, recipients, and hospitals. • Implemented organ matching algorithm based on blood group and availability. • Integrated email verification and real-time status tracking. • Designed relational database schema ensuring data integrity and security.	
Plant Disease Detection System	Python, React
• Built AI-based image classification model for plant disease prediction. • Developed responsive frontend using React.js. • Integrated backend processing and model prediction workflow.	

DataDojo – AI-Powered Learning Platform

React, Node.js

- Designed adaptive learning platform for Data Structures practice.
- Implemented AI-driven question generation and feedback mechanism.

Underwater Image Restoration System

React, SQL

- Developed web application to enhance underwater image clarity and color correction.
- Improved visibility and usability for marine research and photography applications.

Career Canvas – Skill-Based Matching Platform

Django, Bootstrap, SQLite

- Built student-company matching platform based on skills and job requirements.
- Implemented authentication, role-based access control, and secure document handling.

CORE STRENGTHS

Problem Solving | Scalable System Design | Backend Development | Team Collaboration

CERTIFICATIONS

- Networking Basics - **Cisco Networking Academy**
- Introduction to Kubernetes Dockers and AWS Devops Engineer - **Infosys Springboard**
- Knowx Innovations - **Fullstack web Development Internship**

INTERNSHIP DETAILS

Python Full-Stack Developer Intern – Knowx Innovation Pvt Ltd

4 Months

- Developed and maintained full-stack web applications using Django and React.
- Designed REST APIs and integrated frontend-backend modules.
- Followed Software Development Life Cycle (SDLC) practices.

SmartOrgan – Web-Based Organ Management System (Main Project)

- Designed and developed a secure, role-based organ donation management platform.
- Designed normalized relational database schema ensuring data integrity and security.
- Applied authentication, authorization, and backend validation mechanisms.

PERSONAL DETAILS

Date of Birth:	07 January 2002
Father's name:	Shrikant J Kangralkar
Mother's name:	Suman S Kangralkar
Nationality:	Indian
Languages Known:	English, Marathi, Hindi, Kannada
Address:	H.No 4144/1 Kangral Galli Belagavi, Karnataka - 590001

HOBBIES

Competitive Programming | Photography | Traveling

DECLARATION

- I Declare that the details mentioned above are correct and complete to the best of my knowledge.
